

GMS Digital Assessment

Client Success Story

Industry

Pharmaceutical
(Animal Pharma)

Client

One of the leading
international
animal pharma companies

Challenge

Support manufacturing organization with a holistically integrated approach to digitization and assess current and target states to deliver organizations strategy by leveraging best in class technology, drive growth and transitioning from:

- varying capability maturity across the production site network
- limiting insights standalone and/or paper-based processes
- locally focused, site-based initiatives and high technology debt

Solution

- Design and execute a digital maturity assessment framework to identify current state digital site capabilities in support of creating a long-term digital site network capability roadmap
- Provide a comprehensive report suite and heatmaps of current state site solution capabilities and digital scores
- Identify quick win projects and opportunities and facilitate in the creation of a long-term digital plant strategy for the global plant network

Benefits

- Scaled and holistically integrated approach to digitization, leveraging best in class technology and architecture
- Value driven framework and governance for prioritizing digital initiatives globally, balanced with local operational needs
- Industry standard framework for deploying & maturing organizations digital capabilities supporting key business objectives and targets
